Project acronym: NEWSOL

Project full title: NEW StOrage Latent and sensible concept for high efficient CSP plants

Deliverable D1.2 – Data Management Plan

ABSTRACT

In this deliverable the data management plan and data quality plan of NEWSOL project is presented. This information will be essential to ensure that data produced during the Project is handled in an efficient way and also appropriately stored.

In this sense, in this deliverable are defined:

- Data classification;
- Rules related to Intellectual Property;
- Format of the data;
- Repository and access to the data from the public;
- Quality of the data;

This deliverable shows, hence, the core of how the data generated in the project will be handled. All the relevant aspects related to the data stored are defined in this deliverable and shall be followed by all partners.
