**Project acronym: NEWSOL**

**Project full title: NEW StOrage Latent and sensible concept for high efficient CSP plants**

## **Deliverable D9.1 - NEC - Requirement No. 1**

### **ABSTRACT**

In this deliverable a confirmation that the ethical standards and guidelines of Horizon2020 are rigorously applied, regardless of the country in which the research is carried out, is presented. The structure of the deliverable follows the Guidance “How to complete your ethics self-assessment” for H2020 programmes provided by the European Commission. In this sense, the following Ethics issues are analysed:

- Human embryos & fetuses;
- Human beings;
- Human cells or tissues;
- Personal data;
- Animals;
- Non-EU countries;
- Environment, health & safety;
- Dual use;
- Exclusive focus on civil applications;
- Potential misuse of research results;
- Other ethics issues.

For each one of these Ethics issues it is made a careful analysis if there are any conflicts with the present project and if yes which information/documents must be provided.
